# OUR CERTIFICATIONS

## UN38.3

For the transportation of materials classified as hazardous (lithium, lithium métal, lithium ion).

## IEC 62619, IEC 62133 & IEC 60086-4

Main IEC standards for lithium batteries.

## UL2054, UL1642, UL1026

Standards for the American market.

# CSR VALUES

We are committed to integrating the principles of sustainable development into our business, aiming for environmentally friendly and socially responsible stand-alone energy solutions.

## EFFICIENT RECYCLING

Every year, the UPERGY Group processes and recycles a large quantity of its waste: 85 tons of batteries processed or recycled in partnership with specialized collection organizations of which SCRELEC.

## AN ACCURATE CARBON FOOT-PRINT

The UPERGY Group is voluntarily committed to developing a low-carbon strategy as part of the energy transition to a low-carbon economy and society.

## RECYLEX RESPONSIBLE PURCHASING STANDARDS

Our Responsible Purchasing approach has been assessed as compliant with the ISO 20400 guidelines since 2021. In addition, it allows us to assess our current practices and to implement actions, especially with the aim of reducing our CO<sub>2</sub> emissions.
